

Design/Build Experience

Recently Completed Design-Build Projects

Dinter Engineering Company regularly incorporates energy-efficient designs conforming to the latest guidelines of the Model Energy Code, ASHRAE, state energy codes, California Title 24, and local adopted green standards. All of our designs include the latest in energy-efficient systems and reduced-consumption technologies. Dinter has received many awards from utility companies for our energy-efficient designs in both mechanical and electrical engineering disciplines.

Members of our staff have completed a Leadership in Energy and Environmental Design (LEED®) certification course; we employ LEED® Accredited Professionals; and we use LEED® principles and techniques whenever possible to design environmentally-friendly "Green Buildings" incorporating energy efficiency and waste reduction.

- **Beale Air Force Base**, California
